## E-CIGARETTE COLLECTION

Monarch Chemicals is a leading supplier to the e-cigarette market, providing high quality ingredients including Monopropylene Glycol USP and Vegetable Glycerine EP. In addition to this, we work in partnership with leading UK flavour houses to offer you highly innovative and bespoke flavour options so you can produce completely distinctive and original e-liquids for your customers.

We have in place a variety of robust procedures and controls to ensure our products comply with all current legislative requirements along with the Tobacco Products Directive (2014/40/EU).

Working with Monarch Chemicals eliminates the concerns and unpredictable nature of sourcing products, so you can be reassured that our focus is on providing you with consistent, high-quality products and first-rate service.

# BASE CHEMICALS

## VEGETABLE GLYCERINE EP - VG

Our vegetable glycerine is a clear, viscous liquid and has a minimum purity of 99.7%. This product meets the requirements of the European Pharmacopoeia and complies with the purity requirements of the Commission Regulation (EU) 231/2012.

Obtained from non-GMO vegetable fats, this product possesses the highest purity. Our vegetable glycerine is safe and suitable for use in the manufacture of e-liquids where it produces a high percentage of vapour.

## MONOPROPYLENE GLYCOL USP - PG/MPG

Monopropylene glycol is a colourless, organic liquid with a faintly sweet taste. Our USP grade is of the highest purity, able to perfectly carry any flavour whilst providing a well balanced and consistent throat hit every time.

## AVAILABILITY

Both vegetable glycerine EP and monopropylene glycol USP are available in a variety of bulk containers including poly, drum, IBC and bulk tank.

# FLAVOUR CONCENTRATES

Working with Monarch Chemicals grants you direct access to 1000s of unique flavour concentrates which can be mixed, matched and blended to design an inventive, new vape experience, or to use simply as a great stand-alone product.

In the following pages we've compiled our favourites across the collections to provide a taste of what we can offer, but if you do not see what you are looking for, just let us know.

**All flavours are available in 10kg containers.**

# MIXOLOGIST

All bases, flavours, boosts and enhancers can be blended and layered to create unique and innovative new flavours, as well as being added to every day classics to revamp and amplify tired flavours. This enables you to create the exact flavour profiles your customers are demanding with the added ability to fine-tune the vape experience.

Below is a small sample of bespoke flavours which don't quite sit in any one category, offering heaps of mixed fruit and spices with tingling chills and icy freshness.

BLACK ASTAIRE • HEIST N BLAG • HIGHS N BLOWS • PINKMAN • RED ASTAIRE

# BOOSTS + ENHANCERS

Our boosts and enhancers are an excellent way to push flavour and vape experience to the next level. Whether you're looking to amp up the alcohol or mellow out the mints, these products offer everything you need to blend finished products to absolute perfection.

## VAPE ENHANCER

Softens and sweetens.

An exceptional universal sweetener based on ethyl maltol.

## VAPE FIZZ

Adds acidity with a slight 'winey' carbonation. Ideal for drinks.

## VAPE SOUR

Adds a soured acidity. Great for making fruits, sherbets and citrus more complex.

## VAPE TART

Adds a tart acidity, particularly notable when used with apples and red fruits.  
Would lift apple crumble if it tasted too flat.

## VAPE TINGLE

Provides a unique tingling sensation.  
Enhances the fizz in soda and fizzy pop flavours.

Monarch  
delivering the solution

# BOOSTS + ENHANCERS

Continued

## BAKE BOOST

Enriches and enhances cookie, biscuit and pastry notes for maximum indulgence.

## BERRY SWEET

Adds a sumptuous jamminess and fills out berries or red fruits to offer depth and complexity.

## BITTER BOOST

Amps up any alcohol flavour to bring out the boozy profile.

## BROWN BOOST

Provides a more caramel/toffee edge. Expect notes of brown/demerara sugar with this, adding a darker tone to the flavour profile.

## CREAM SWEET

Adds an indulgent richness to vanilla or milky tones. Compliments peaches and ideal for filling out mints if they're empty.

## DAIRY SWEET

Adds body and a luscious richness for a truly indulgent experience. Provides a melting ice-cream richness.

## RED SWEET

Adds warmth, depth and body to berries and currants.

## VANILLA BOOSTER

Softens out any lingering brown tones.
